## **MANAGEMENT LETTER**

November 8, 2021

To the Board of Directors of  
Cornelius Arts and Community Center, Inc.  
d/b/a Cain Center for the Arts  
Cornelius, North Carolina

We have audited the financial statements of Cornelius Arts and Community Center, Inc., d/b/a Cain Center for the Arts (the "Center") for the year ended June 30, 2021, and have issued our report dated November 8, 2021. Professional standards require that we provide you with the following information related to our audit.

In planning and performing our audit of the financial statements of Cornelius Arts and Community Center, Inc., d/b/a Cain Center for the Arts as of and for the year ended June 30, 2021, in accordance with auditing standards generally accepted in the United States of America, we considered the Center's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Center's internal control. Accordingly, we do not express an opinion on the effectiveness of the Center's internal control.

Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process safeguards to reduce, though not eliminate, this risk.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or a combination of control deficiencies, that adversely affects the Center's ability to initiate, authorize, record, process, or report financial data reliably in accordance with U.S. generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the Center's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control. A material weakness is a significant deficiency, or a combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of internal control was for the limited purpose described in the first paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control that we consider to be material weaknesses, as defined above.

This report is intended solely for the information and use of the management and staff within the Center and is not intended to be and should not be used by anyone other than these specified parties.
